

Murial Anindo

Full Stack Software Engineer

twentymurial22@gmail.com

[Linkedin](#) | [Portfolio](#)

Virginia-based Full Stack Engineer skilled in **Javascript, React, Node, PostgreSQL & Git**. Trained in computer science fundamentals (object oriented programming, data structures, algorithms, databases, version control systems) by tech bootcamp. With years of experience in agile project management, ready to collaborate with product teams to build scalable SaaS products.

Software Engineering Projects

Murial's Menu [Github](#)

Created an application for food enthusiasts to create, view, and manage digital menu items.

- Developed components using **Node and React** with **Material UI**, enabling users to perform different CRUD operations on their digital menu.
- Integrated **third-party APIs** to enhance functionality and extend capabilities.

Work Experience

Agile Project management experience working with startup, mid-size and enterprise organizations.

Engineering Intern at Folio

2024 - Present

Improved web application SEO by updating and optimizing CSS, resulting in higher search engine rankings and increased visibility.

Optimized the search component through the implementation of React hooks and router.

Stack: AWS, React, Typescript, PHP

Senior Program Manager at Amazon

2022 - 2024

Developed a React application with embedded **AWS QuickSight** dashboards, empowering users to make informed decisions quickly and efficiently with tailored permission groups ensuring data security.

Led the implementation of a **Data Protection solution** across various teams, partnering with cross-functional teams and engaging with stakeholders at senior levels to provide updates.

Collaborated with **cross-functional teams** such as Product Managers, UX Designers, and other Engineers to design, prototype, and deliver high-quality guest-facing products.

Stack: AWS QuickSight, Amplify/React, AWS Cognito (SSO), RedShift, S3

Junior Software Developer at Lonett

2020 - 2022

 As a founding junior Developer, at Lonett, I developed features for a platform designed for helping future homeowners find the best mortgage rates.

Implemented **login and registration** functionality increasing the applications security.

Stack: React, Material UI, .NET

Technical Program Manager at Cloudistics

2019 - 2020

Implemented a **PowerShell script** to automate the asset transfer process i.e. for bulk import and export to external sources, resulting in a 50% increase in the speed of asset transfers

Managed and led Engineering **sprint ceremonies** and measured sprint health by specifying acceptance criteria and refining program scope.
