SOFTWARE ENGINEER

I am a results-driven full-stack engineer with a proven track record of leveraging my programming skills to catalyze organizational growth. My goal is to secure a challenging position in an innovative company where I can contribute to measurable improvements and drive success.

TECHNICAL SKILLS

Programming Languages: Javascript | NextJS | SQL | TypeScript | CSS | HTML

Front-End Development: React | StyledComponents | MaterialUI | NextJS | React Hooks | TailwindCSS

Back-End Development: NodeJS

Cloud Computing: AWS | GCP

Other Skills: Git | REST APIs | Unit Tests | Prisma | Cloudinary API | PostgreSQL | Agile Methodologies

APPLICATION DEVELOPMENT EXPERIENCE

Murial's Menu - [murials_menu](#)

React | NodeJS | Prisma | Cloudinary | StyledComponents

Developed and deployed a feature-rich personal catalog application designed for food enthusiasts. With Murial's Menu, users can easily explore, organize, and edit their culinary experiences, ensuring that no delightful dish is forgotten.

Ain't Board - [AintBoard](#)

React | NextJS | Prisma | TypeScript | StyledComponents

Developed an interactive board game web app that facilitates gamers in generating reviews, submitting reviews, and accessing other gaming challenges.

EXPERIENCE

Amazon

Remote

Senior Program Manager / Junior Developer

Jan 2022- Jan 2024

- Designed and implemented a React application with embedded QuickSight dashboards. I enabled users to seamlessly access and validate data in a centralized location, empowering them to make informed decisions quickly and efficiently. The project's emphasis on tailored permission groups ensures data security, while UI enhances user experience.
- Coordinated the implementation of a data protection solution across various teams, collaborating with cross-functional teams and engaging with stakeholders at senior levels to ensure successful deployment.

Lonett Inc

Remote

Front-End Developer

Mar 2020- Feb 2022

- As a pivotal member of the founding team, I played a crucial role in shaping and executing the development and pre-launch initiatives for loan application software. Our primary goal was to streamline the mortgage application process, empowering users to seamlessly apply for, submit, and track the progress of their applications.
- I crafted the UI components for signup and registration forms utilizing Material UI. I engineered a simplified and user-friendly sign-in process to drive an uptick in registrations and acquire paying customers.

Cloudistics

Reston, VA

Technical Program Manager

Feb 2019 - July 2020

- I led the deployment of SaaS applications to oversee and monitor deliverables across diverse technical teams. The goal was to enhance delivery efficiency and ensure smooth coordination throughout a yearlong services agreement, ultimately contributing to revenue growth.
- Dramatically accelerated our asset transfer process by implementing a PowerShell script designed for bulk import and export to external sources. Consequently, the broader team achieved a 50% increase in the speed of asset transfers.

EDUCATION

- Bachelors in Journalism. Texas Southern University, 2011. 3.80 GPA
- Masters in Business Administration. Texas Woman's University, 2013. 3.80 GPA

George Washington Bootcamp

- Completed an intensive three-month development training program. The program provided a comprehensive understanding of coding languages and technologies.
